

Year 10/11 Curriculum 2016/17

Every young person can achieve at Devon Studio School and we ensure this by putting equal emphasis on academic, vocational and personal development. This means that we treat every student as an individual and work with them and their family to design a curriculum and timetable which is right for them. Health, social care and childcare are at the heart of our curriculum and all students study these subjects for at least four hours per week. We have a wide range of additional GCSE's and vocational qualifications on offer delivered via an academic or technical route and compliment these with programmes of personal and social development, 1:1 coaching, exercise and fitness and creative activities all aimed at preparing for a career working with people in a health, social care or childcare setting. At our initial meeting we will work through the most appropriate route for your child.
